SPIRIT

XBR25 Semi-Recumbent Bike
OWNER'S MANUAL

Please carefully read this entire manual before operating your new Semi-Recumbent Bike.

Table Of Contents

ATTENTION

This fitness bike is intended for residential use only and is warranted for this application. Any other application voids this warranty in its entirety.

Important Safety Instructions

When using an electrical appliance, basic precautions should always be followed, including the following:

WARNING - Read all instructions before using this appliance.

DANGER - To reduce the risk of electric shock disconnect your fitness bike from the electrical outlet prior to cleaning and/or service work.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons, install the fitness bike on a flat level surface with access to a 230-volt,10-amp / 110-volt,15-amp amp grounded outlet with only the fitness bike plugged into the circuit.

DO NOT USE AN EXTENSION CORD UNLESS IT IS A 14AWG OR BETTER, WITH ONLY ONE OUTLET ON THE END:

WARNING - To reduce the risk of burns, fire electric shock, or injury to persons:

- An appliance should never be left unattended when plugged in. Unplug from outlet when not in use, and before putting on or taking off parts.
- Do not operate under blanket or pillow. Excessive heating can occur and cause fire, electric shock, or injury to persons.
- Close supervision is necessary when this appliance is used by, on, or near children, invalids, or disabled persons.
- Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.
- Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the appliance to a service center for examination and repair.
- Do not carry this appliance by supply cord or use cord as a handle.
- Keep the cord away from heated surfaces.
- Never operate the appliance with the air openings blocked. Keep the air openings free of lint, hair, and the like.
- Never drop or insert any object into any opening.
- Do not use outdoors.
- Do not operate where aerosol (spray) products are being use or where oxygen is being administered.
- Connect this appliance to a properly grounded outlet only.
- The appliance is intended for household use.
- This appliance is not intended for use by persons with reduced physical, sensory or metal capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Keep children under the age of 13 away from this machine.
- The bike is not a medical device.

SAVE THESE INSTRUCTIONS - THINK SAFETY!

Fitness Equipment Safety Instructions

■ To disconnect turn all controls to the off position, then remove the plug from the outlet.
■ Do not operate equipment on deeply padded, plush or shag carpet. Damage to both carpet and equipment may result.
■ Before beginning this or any exervise program, consult a physician. This is especially important for persons over the age of 35 or persons with pre-existing health conditions.
■ Do not attempt to use your equipment for any purpose other than for the purpose it is intended.
■ Keep hands away from all moving parts.
■ The pulse sensors are not medical devices. Their purpose is to provide you with an approximate measurement in relation to your target heart rate. Use of a chest transmitter strap (sold separately) is a much more accurate method of heart rate analysis .Various factors, including the user's movement, may affect the accuracy of heart rate readings. The pulse sensors are intended only as exercise aids in determining heart rate trends in general.
■ Wear proper shoes. High heels, dress shoes, sandals or bare feet are not suitable for use on your equipment. Quality athletic shoes are recommended to avoid leg fatigue.

Failure to follow all guidelines may compromise the effectiveness of the exercise experience, expose yourself (and possibly others) to injury, and reduce the longevity of the equipment.

Important Electrical Instructions

WARNING!

NEVER remove any cover without first disconnecting D.C. power. If voltage varies by ten percent (10%) or more, the performance of your fitness bike may be affected. Such conditions are not covered under your warranty. If you suspect the voltage is low, contact your local power company or a licensed electrician for proper testing.

NEVER expose this fitness bike to rain or moisture. This product is **NOT** designed for use outdoors, near a pool or spa, or in any other high humidity environment. The operating temperature specification is 40 to 120 degrees Fahrenheit, and humidity is 95% non-condensing (no water drops forming on surfaces).

Important Operation Instructions

■ **NEVER** operate this fitness bike without reading and completely understanding the results of any operational change you request from the computer.
■ Understand that changes in resistance do not occur immediately. Set your desired resistance level on the computer console and release the adjustment key. The computer will obey the command gradually.
■ **NEVER** use your fitness bike during an electrical storm. Surges may occur in your household power supply that could damage fitness bike components. Unplug the fitness bike during an electrical storm as a precaution.
■ Use caution while participating in other activities while pedaling on your fitness bike; such as watching television, reading, etc. These distractions may cause you to lose balance which may result in serious injury.
■ Do not use excessive pressure on console control keys. They are precision set to function properly with little finger pressure.

Assembly Instructions

Pre-Assembly

1. Using a razor knife (Box Cutter), cut the banding straps that wrap around the carton. Reach under the bottom edge of the carton and pull it away from the cardboard underneath, separating the staples that join the two together. Lift the box over the unit and unpack.
2. Carefully remove all parts from carton and inspect for any damage or missing parts. If damaged parts are found, or parts are missing, contact your dealer immediately.
3. Locate the hardware package. The hardware is separated into four steps. Remove the tools first. Remove the hardware for each step as needed to avoid confusion. The numbers in the instructions that are in parenthesis (#) are the item number from the assembly drawing for reference.
Assembly Tools
#112. 12/14mm Wrench
#132. 14/15mm Wrench

#114. Phillips Head Screwdriver

STEP 1: Rear Stabilizer & Seat Back

1. AtInstall the **REAR STABILIZER** (**7**) onto the **MAIN FRAME** with 2 **BOLTS** (**65**) and 4 **WASHERS** (**84**).
2. Install the **SEAT BACK** (**5**) onto the **SEAT CARRIAGE** (**4**) with 2 **BOLTS** (**67**) installed through the top holes and secured with 2 **FLAT WASHERS** (**77**) and **NYLOC NUTS**(**89**). Install 2 **BOLTS** (**142**) through the side holes and secure with 2 **FLAT WASHERS**(**77**) and **NYLON NUTS** (**89**).
3. Insert an **END CAP** (**32**) into each opening of the **FRONT STABILIZER TUBE**. You may need to tap them in with a rubber mallet if they are tight..

HARDWARE
|			
#77. 3/8" x 19 x 1.5T Flat Washer (4 pcs)	**#84.** 3/8" x 25 x 2T Flat Washer (2 pcs)	**#89.** 3/8" x 7T Nyloc Nut (4 pcs)	**#65.** 3/8" x 53mm Carriage Bolt (2 pcs)
#67. 3/8" x 4" Hex Head Bolt (2 pcs)		**#142.** 3/8" x 4-1/4" Hex Head Bolt (2 pcs)	**#191.** 3/8" Cap Nut (2 pcs)

STEP 2: Console Mast

1. Slide the **COMPUTER CABLE** (**44**) through the bottom of the **CONSOLE MAST COVER** (**31**) and then the bottom of the **CONSOLE MAST** (**2**). Make sure the Console Mast Cover is correctly oriented (see illustration).
2. Install the **CONSOLE MAST** (**2**) into the receiving tube **(MAKE SURE NOT TO PINCH CABLE** (**44**); **DAMAGE TO THE ELECTRONICS COULD OCCUR) OF THE MAIN FRAME** (**1**). Insert 2 **HEX HEAD BOLTS** (**68**) and 2 **FLAT WASHERS** (**76**) on each side. Insert 2 **HEX HEAD BOLTS** and 2 **CURVED WASHERS** (**83**) on the front. Tighten all 6 bolts firmly with the **WRENCH** (**112**).
3. Remove the white styrofoam pad (factory installed to prevent bolts from being accidentally dropped into the Console Mast Tube).
4. Insert the **COMPUTER CABLE** (**44**) and **HAND PULSE CABLE** (**45**) into their respective connectors in the back of the **CONSOLE ASSEMBLY** (**19**). Attach the console onto the mounting plate with 4 **PHILLIPS HEAD SCREWS** (**99**). Tighten with the **PHILLIPS HEAD SCREW DRIVER** (**114**).
5. Attach the **HANDLE BAR ASSEMBLY** (**3**) onto the **CONSOLE MAST** (**2**) bracket with the 2 **HEX HEAD BOLTS** (**68**), 2 **SPLIT WASHERS** (**82**), and 2 **FLAT WASHERS** (**76**). Completely tighten with the **WRENCH** (**112**).

HARDWARE

| **#82.** 5/16" x 1.5T Split Washer (2 pcs) | **#83.** 5/16" x 19 x 1.5T Curved Washer (2 pcs) | **#68.** 5/16" x 5/8" Hex Head Bolt (8 pcs) | **#76.** 5/16" x 18 x 1.5T Flat Washer (6 pcs) | **#99.** M5 x 12mm Phillips Head Screw (4 pcs) |
6
1050113PM0825

STEP 3: Seat & Handle Bar

1. Install the **SEAT** (**61**) on the **SEAT CARRIAGE** (**4**) with 4 **PHILLIPS HEAD SCREWS** (**98**).Tighten with the **PHILLIPS HEAD SCREW DRIVER** (**114**).
2. Attach the **SEAT HANDLE BAR** (**6**) to the **SEAT CARRIAGE** (**4**) with the 4 **HEX HEAD BOLTS** (**71**), 4 **FLAT WASHERS** (**77**), and 4 **NYLOC NUTS** (**89**).Tighten with the Wrenches provided (**112** & **132**).
3. Plug the **HAND PULSE SENSOR CABLES** (**27**) into the left side of the rear plastic cover.

HARDWARE
| **#98.** M6 x 15mm Phillips Head Screw (4 pcs) | **#89.** 3/8" x 7T Nyloc Nut (4 pcs) | **#77.** 3/8" x 19 x 1.5T Flat Washer (4 pcs) | **#71.** 3/8" x 1-3/4" Hex Head Bolt (4 pcs) |
7
STEP 4: Plastic Parts

1. Attach the **PEDALS** (L, R)(**116**,**117**) to the **CRANK ARMS** (**51L**, **51R**).Tighten with the **WRENCH** (**132**). Remember that the **LEFT PEDAL** has a reverse thread and will be threaded onto the Crank arm in a **COUNTERCLOCKWISE MOTION**. There is an "L" stamped in the end of the threaded post of the left pedal and an "R" in the right. Make sure to tighten the pedals as firmly as you can. It may be necessary to re-tighten the pedals if you feel a thumping while pedaling the bike. A thumping or clicking noise is usually caused by loose pedals.

2. Attach the **DRINK BOTTLE HOLDERS** (**L39** & **R38**) to the sides of the **SEAT HANDLE BAR** (**6**) with 4 **SHEET METAL SCREWS** (**105**).Tighten with the **PHILLIPS HEAD SCREW DRIVER** (**114**).

Operation of Your Console

Large Blue-LED Matrix Window

Message Center

Convenient cargo compartment for keys, phone, or MP3 player

Fan to keep you cool

Six innovative programs offer a variety of work-outs

Easy-Touch Control Buttons

Power

When the power cord is connected to the equipment, the console will automatically Power up.

When initially powered on the console will perform an internal self-test. During this time all the lights will turn on. When the lights go off, the Message Center will show the software version (i.e.: VER 1.0). The distance window shows the distance in miles & km and the time window shows the total hours of use.

The odometer will remain displayed for only a few seconds then the console will go to the start up display. The dot matrix display will be scrolling through the different profiles of the programs and the Message Center will be scrolling the star t up message. You may now begin to use the console.

Dot Matrix Center Display

Twenty columns of boxes (10 high) indicate each segment of a workout. The boxes only show an approximate level (resistance) of effort. They do not necessarily indicate a specific value - only an approximate percent to compare levels of intensity. In Manual Operation the resistance dot matrix window will build a profile "picture" as values are changed during a workout.

Quick Start

This is the quickest way to start a workout. After the console powers up you just press the **Start** key to begin, this will initiate the Quick Start mode. In Quick Start the Time will count up from zero and the workload may be adjusted manually by pressing the **Level Up / Down** buttons. The dot matrix display will have only the bottom row lit at first. As you increase the work load more rows will light indicating a harder workout. The fitness bike will get harder to pedal as the rows increase.

There are 20 levels of resistance available for plenty of variety. The first 5 levels are very easy workloads and the changes between levels are set to a good progression for de-conditioned users. Levels 6-10 are more challenging, but the increases in resistance from one level to the next remain small. Levels 11-15 start getting tough as the levels jump more dramatically. Levels 16-20 are extremely hard and are good for short interval peaks and elite athletic training.

Basic Information

The **Message Center** will initially be displaying the Program name. When in scan mode during a program, speed will be displayed for four seconds, then move on and display Watts (indication of workload). If 100 watts is displayed, you are doing enough work to keep a 100-watt light bulb lit. The data changes to Laps completed, Segment time, Max level. Pressing the **Enter** button again will bring you back to the beginning.

The **Stop** button actually has several functions. Pressing the **Stop** key once during a program will pause the program for 5 minutes. If you need to get a drink, answer the phone or any of the many things that could interrupt your workout, this is a great feature. To resume your workout during Pause, just press the **Start** key. If the **Stop** button is pressed twice during a workout, the program will end and the console will display your Workout Summary (Total time, Avg. Speed, Avg. Watts, Avg. HR, total Laps). If the **Stop** key is held down for 3 seconds or a third time during the program, the console will perform a complete **Reset**. During data entry for a program the Stop key performs a previous screen or segment function. This allows you to go back to change programming data.

Program Keys

The Program Keys are used to preview each program. When you first turn the console on you may press each program key to preview what the program profile looks like. If you decide that you want to try a program, press the corresponding program key and then press the **Enter** key to select the program and enter into the data-setting mode.

The fitness bike has a built in heart rate monitoring system. Simply grasping the hand pulse sensors on the stationary handle bars or wearing the heart rate transmitter (see Using Heart Rate Transmitter section) will start the Heart Icon blinking (this may take a few seconds).The Pulse Display Window will display your heart rate, or Pulse in beats per minute.

The console includes a built-in fan to help keep you cool. To turn the fan on, press the button on the left side of the console.

Programming The Console

Each of the programs can be customized with your personal information and changed to suit your needs. Some of the information asked for is necessary to ensure the readouts are correct. You will be asked for your Age and Weight. Entering your Age is necessary during the Heart Rate programs to ensure the correct settings are in the program for your Age. Otherwise the

work settings could be too we cannot provide an exact calorie count, we do want to be as close

as possible.

CALORIE NOTE: Calorie readings on every piece of exercise equipment, whether it is in a gym or at home, are not accurate and tend to vary widely. They are meant only as a guide to monitor your progress from workout to workout. The only way to measure your calorie burn accurately is in a clinical setting connected to a host of machines. This is because every person is different and burns calories at a different rate. Some good news is that you will continue to burn calories at an accelerated rate for at least an hour after you have finished exercising!

Entering A Program & Changing Settings

When you enter a program, by pressing a program key, then Enter key, you have the option of entering your own personal settings. If you want to workout without entering new settings, then just press the Start key. This will bypass the programming of data and take you directly to the start of your workout. If you want to change the personal settings then just follow the instructions in the Message Center. If you start a program without changing the settings, the default or saved settings will be used.

NOTE: Age and Weight default settings will change when you enter a new number. So the last Age and Weight entered will be saved as the new default settings. If you enter your Age and Weight the first time you use the fitness bike, you will not have to enter it every time you work out unless either your Age or Weight changes or someone else enters a different Age and Weight.

Programmable Features

MANUAL

The Manual program works as the name implies, manually. This means that you control the workload and not the computer. To start the Manual program, follow the instructions below or just press the Manual button, then the Enter button and follow the directions in the Message Center.

1. Press the **Manual** key, then press the **Enter** key.
2. The Message Center will ask you to enter your **Age**. You may enter your age, using the **Level Up/Down keys**, then press the Enter key to accept the new value and proceed on to the next screen.
3. You are now asked to enter your **Weight**. You may adjust the Weight value using the **Level Up/Down keys**, then press Enter to continue.
4. Next is **Time**. You may adjust the **Time** and press **Enter** to continue.
5. Now you are finished editing the settings and can begin your workout by pressing the **Start** key. You can also go back and modify your settings by pressing the **Enter** key.
6. Once the program starts you will be at level one. This is the easiest level and it is a good idea to stay at level one for a while to warm up. If you want to increase the work load at any time press the **Level Up key**; the **Level Down key** will decrease the work-load.
7. During the Manual program you will be able to scroll through the data in the Message Center by pressing the **Enter** key.
8. When the program ends you may press **Start** to begin the same program again or **Stop** to exit the program.

Preset Programs

The Semi - Recumbent Bike has five different programs that have been designed for a variety of workouts. These five programs have factory preset work level profiles for achieving different goals.

HILL

This program follows a triangle or pyramid type of gradual progression from approximately 10% of maximum effort (the level that you chose before starting this program) up to a maximum effort which lasts for 10% of the total workout time, then a gradual regression of resistance back to approximately 10% of maximum effort.
FAT BURN

This program follows a quick progression up to the maximum Resistance level (default or user input level) that is sustained for 2/3 of the workout.This program will challenge your ability to sustain your energy output for an extended period of time.
CARDIO

This program presents a quick progression up to near maximum resistance level (default or user input level).
It has slight fluctuations up and down to allow your heart rate to elevate, and then recover repeatedly, before beginning a quick cool down. This will build up your heart muscle and increase blood flow and lung capacity.
INTERVAL

This program takes you through high levels of intensity followed by recovery periods of low intensity. This program utilizes and develops your "Fast Twitch" muscle fibers which are used when performing tasks that are intense and short in duration. These deplete your oxygen level and spike your heart rate, followed by periods of recovery and heart rate drop to replenish oxygen. Your cardiovascular system gets programmed to use oxygen more efficiently.
Programming Preset Programs

1. Select the desired program button then press the **Enter** key.
2. The **Message Center** will ask you to enter your **Age**. You may adjust the age setting, using the **Up** and **Down** keys, then press the **Enter** key to accept the new number and proceed on to the next screen.
3. You are now asked to enter your **Weight**. You may adjust the weight number using the **Up** and **Down** keys, then press Enter to continue.
4. Next is **Time**. You may adjust the **Time** and press **Enter** to continue.
5. Now you are asked to adjust the **Max Resistance Level**. This is the peak exertion level you will experience during the program (at the top of the hill). Adjust the level and then press **Enter**.
6. Now you are finished editing the settings and can begin your workout by pressing the **Start** key. You can also go back and modify your settings by pressing the **Enter** key to go back one level, or screen.
7. If you want to increase or decrease the workload at any time during the program press the **Up** or **Down** key. This will change the resistance settings of the entire profile, although the profile picture on the screen will not change. The reason for this is so that you can see the entire profile at all times. If the profile picture is changed,   it also would be distorted and not a true representation of the actual profile. When you make a change to the resistance, the Message Center will show the current column and program maximum levels of work.
8. During the program you will be able to scroll through the data in the **Message Center** the message Center by pressing the **Enter** key.
9. When the program ends the **Message Center** will show a summary of your workout. The summary will be displayed for a short time then the console will return to the star t-up display.

HEART RATE PROGRAMS

The old motto, "no pain, no gain", is a myth that has been overpowered by the benefits of exercising comfortably. A great deal of this success has been promoted by the use of heart rate monitors. With the proper use of a heart rate monitor, many people find that their usual choice of exercise intensity was either too high or too low and exercise is much more enjoyable by maintaining their heart rate in the desired benefit range.

To determine the benefit range in which you wish to train, you must first determine your Maximum Heart Rate. This can be accomplished by using the following formula: 220 minus your age. This will give you the Maximum Heart Rate (MHR) for someone of your age. To determine the effective heart rate range for specific goals you simply calculate a percentage of your MHR. Your Heart rate training zone is 50% to 90% of your maximum heart rate. 60% of your MHR is the zone that burns fat while 80% is for strengthening the cardio vascular system. This 60% to 80% is the zone to stay in for maximum benefit.

For someone who is 40 years old
their target heart rate zone is calculated:

220 – 40 = 180 (maximum heart rate)
180 x .6 = 108 beats per minute
      (60% of maximum)
180 X .8 = 144 beats per minute
      (80% of maximum)

So for a 40 year old the training zone would be 108 to 144 beats per minute.

If you enter your age during programming the console will perform this calculation automatically. Entering your age is used for the Heart Rate programs. After calculating your MHR you can decide upon which goal you would like to pursue.

TARGET HEART RATE TRAINING CHART
The two most popular reasons for, or goals, of exercise are cardiovascular fitness (training for the heart and lungs) and weight control. The black columns on the chart above represent the MHR for a person whose age is listed at the bottom of each column. The training heart rate, for either cardiovascular fitness or weight loss, is represented by two different lines that cut diagonally through the chart. A definition of the lines' goal is in the bottom left-hand corner of the chart. If your goal is cardiovascular fitness or if it is weight loss, it can be achieved by training at 80% or 60% respectively, of your MHR on a schedule approved by your physician. Consult your physician before participating in any exercise program.

With all Heart Rate program fitness bikes you may use the heart rate monitor feature without using the Heart Rate program. This function can be used during manual mode or during any of the nine different programs. The Heart Rate program automatically controls incline.

RATE OF PERCEIVED EXERTION

Heart rate is important but listening to your body also has a lot of advantages. There are more variables involved in how hard you should workout than just heart rate. Your stress level, physical health, emotional health, temperature, humidity, the time of day, the last time you ate and what you ate, all contribute to the intensity at which you should workout. If you listen to your body, it will tell you all of these things.

The rate of perceived exertion (RPE), also know as the Borg scale, was developed by Swedish physiologist G.A.V. Borg. This scale rates exercise intensity from 6 to 20 depending upon how you feel or the perception of your effort.

The scale is as follows:

Rating Perception of Effort

6 Minimal
7 Very, very light
8 Very, very light +
9 Very light
10 Very light +
11 Fairly light
12 Comfortable
13 Somewhat hard
14 Somewhat hard +
15 Hard
16 Hard +
17 Very hard
18 Very hard +
19 Very, very hard
20 Maximal

You can get an approximate heart rate level for each rating by simply adding a zero to each rating. For example a rating of 12 will result in an approximate heart rate of 120 beats per minute. Your RPE will vary depending up the factors discussed earlier. That is the major benefit of this type of training. If your body is strong and rested, you will feel strong and your pace will feel easier. When your body is in this condition, you are able to train harder and the RPE will support this. If you are feeling tired and sluggish, it is because your body needs a break. In this condition, your pace will feel harder. Again, this will show up in your RPE and you will train at the proper level for that day.

USING HEART RATE TRANSMITTER (OPTIONAL)

How to wear your wireless chest strap transmitter:

1. Attach the transmitter to the elastic strap using the locking parts.
2. Adjust the strap as tightly as possible as long as the strap is not too tight to remain comfortable.
3. Position the transmitter with the logo centered in the middle of your torso facing away from your chest (some people must position the transmitter slightly left of center). Attach the final end of the elastic strap by inserting the round end and, using the locking parts, secure the transmitter and strap around your chest.
4. Position the transmitter directly below the pectoral muscles.
5. Sweat is the best conductor to measure very minute heart beat electrical signals. However, plain water can also be used to pre-wet the electrodes (2 ribbed oval areas on the reverse side of the belt and both sides of the transmitter). It's also recommended that you wear the transmitter strap a few minutes before your work out. Some users, because of body chemistry, have a more difficult time in achieving a strong, steady signal at the beginning. After "warming up", this problem lessens. As noted, wearing clothing over the transmitter/strap doesn't affect performance.
6. Your workout must be within range - distance between transmitter/receiver – to achieve a strong steady signal. The length of range may vary somewhat but generally stay close enough to the console to maintain good, strong, reliable readings. Wearing the transmitter directly on bare skin assures you of proper operation. If you wish, you may wear the transmitter over a shirt. To do so, wet the areas of the shirt that the electrodes will rest upon.
Note: The transmitter is automatically activated when it detects activity from the user's heart. Additionally, it automatically deactivates when it does not receive any activity. Although the transmitter is water resistant, moisture can have the effect of creating false signals, so you should take precautions to completely dry the transmitter after use to prolong battery life (estimated transmitter battery life is 2500 hours). The replacement battery is Panasonic CR2032.

Erratic Operation

Caution! Do not use this Semi - Recumbent Bike for Heart Rate programs unless a steady, solid Actual Heart Rate value is being displayed. High, wild, random numbers being displayed indicate a problem.

Areas to look for interference which may cause erratic heart rate:

1. Microwave ovens, TV's, small appliances, etc.

2. Fluorescent lights.

3. Some household security systems.

4. Perimeter fence for a pet.

5. Some people have problems with the transmitter picking up a signal from their skin. If you have problems try wearing the transmitter upside down. Normally the transmitter will be oriented so the Spirit Fitness logo is right side up.

6. The antenna that picks up your heart rate is very sensitive. If there is an outside noise source, turning the whole machine 90 degrees may de-tune the interference.

7. Another Individual wearing a transmitter within 3' of your machine's console.

If you continue to experience problems contact your dealer.

Using the Spirit FIT App (OPTIONAL)

In order to help you achieve your exercise goals, your new exercise machine comes equipped with a Bluetooth® transceiver that will allow it to interact with selected phones or tablet computers via the Spirit Fit App.

Just download the free Spirit Fit App from the Apple Store or Google Play, and then follow the instructions in the App to sync with your exercise machine. Now you can view current workout data in three different Display screens on your device. You can also easily switch back and forth from the workout display view to internet/social media/email sites via icons on the display screen. When your workout is finished, the data is automatically   saved to the built-in personal calendar for future reference.

The Spirit Fit App also allows you to sync your workout data with one of many fitness cloud sites we support: iHealth, MapMyFitness, Record or Fitbit, with more to come. Syncing the App with your exercise machine:

1. Download the App.
2. Open the App on your device (phone or tablet) and make sure Bluetooth® is enabled on your device(phone or tablet).
3. In the App click the icon in the top left corner to search for your Spirit equipment (shown right).
4. After the equipment   is detected, click Connect. When the App and equipment are synced, the Bluetooth® icon on the equipment's console display will light up. You may now star t using your new Spirit Fitness product.
5. When you workout is finished, the data is automatically   saved and you will be prompted to sync your data with each available fitness cloud site.   Please note you will have to download the applicable compatible fitness App, such as iHealth, MapMyFitness, Record, Fitbit, etc, in order for the icon to be active and available.

   Note: Your device will need to be running on a minimum   operating system of iOs 7 or Android 4.4 for the Spirit Fit App to operate 30   properly.

Heart Rate Program Operation

Note: You must wear a heart rate transmitter strap (sold separately) for this program.
The Heart Rate program default setting is 60% of your projected maximum heart rate. The 60-80%
range is more conducive for fat loss goals and 81-100% ranges are generally used for cardiovascular conditioning goals and high intensity interval training.

To start the program follow the instructions below or just press the HR key, then press the Enter
button and follow the directions in the Message Center.

After selecting your heart rate target, the program will attempt to keep you at or within 3-5 heart beats per minute of this value. Follow the prompts in the Message Center to maintain your selected heart rate value.

1. Press the HR 1 or HR 2 key then press the **Enter** key.
2. The Message Center will ask you to enter your **Age**. You may enter your age, using the **Level Up/Down keys,** then press the **Enter** key to accept the new value and proceed on to the next screen.
3. You are now asked to enter your **Weight**. You may adjust the weight value using the **Level Up/Down keys,** then press **Enter** to continue.
4. Next is **Time**. You may adjust the time and press **Enter** to continue.
5. Now you are asked to adjust the Heart Rate Target. This is the heart rate level you will strive to maintain during the program. Adjust the level using the **Level Up/Down keys**, then press **Enter.** *Note: The heart rate that appears is based on the % you accepted in Step 1. If you change this number it will either increase or decrease the % from Step 1.*
6. Now you are finished editing the settings and can begin your workout by pressing the **Start** key. You can also go back and modify your settings by pressing the **Enter** key.
7. If you want to increase or decrease the workload at any time during the program press the **Level Up/Down key**. This will allow you to change your target heart rate at any time during the program.
8. During the HR program you will be able to scroll through the data in the Message Center by pressing the **Enter** key.
9. When the program ends you may press **Start** to begin the same program again or **Stop** to exit the program.

General Maintenance

1. Wipe down all areas in the sweat path with a damp cloth after each workout.
2. If a squeak, thump, clicking or rough feeling develops the main cause is most likely one of two reasons:
   I. The hardware was not sufficiently tightened during assembly. All bolts that were installed during assembly need to be tightened as much as possible. It may be necessary to use a larger wrench than the one provided if you cannot tighten the bolts sufficiently. I cannot stress this point enough; 90% of calls to the service department for noise issues can be traced to loose hardware.
   II. The crank arm nut needs to be retightened
   III. If squeaks or other noises persist, check that the unit is properly leveled. There are 2 leveling pads on the bottom of the rear stabilizer, use a 14mm wrench (or adjustable wrench) to adjust the levelers.

Engineering Mode Menu

The console has built in maintenance/diagnostic software. The software will allow you to change the console settings from English to Metric and turn off the beeping of the speaker when a key is pressed for example. To enter the Engineering Mode Menu, press and hold down the **Start**,
Stop and **Enter** keys. Keep holding the keys down for about 5 seconds and the Message Center will display Engineering Mode Menu. Press the **Enter** button to access the menu below:

a. Key Test (Will allow you to test all the keys to make sure they are functioning)
b. LCD Test (Tests all the display functions)
c. Functions (Press **Enter** to access settings and **UP** arrow to scroll)
   i. Display Mode (Turn off to have the console power down automatically after 20 minutes of inactivity)
   ii. Pause Mode (Turn on allow 5 minutes of pause, turn off to have the console pause indefinitely)
   iii. ODO Reset (Resets the odometer)
   iv. Units (Sets the display to readout in English or Metric display measurements)
   v. Beep (Turns off the speaker so no beeping sound is heard)
   vi. Motor test
   vii. Safety
   viii. Security (Allows the keypad to be locked to prevent unauthorized use)

Parts List

Part Number	Part Description	Qty per unit
1	Main Frame	1
2	Console Mast	1
3	Mast Handle bar Assembly	1
4	Seat Carriage	1
5	Seat Back Bracket	1
6	Seat Handle Bar	1
7	Rear Stabilizer	1
8	Crank Axle	1
9L	Seat Wheel Adjustment Plate (L)	2
9R	Seat Wheel Adjustment Plate (R)	2
10	Idler Wheel Assembly	1
11	Seat Stop Axle	2
12	Seat Position Latch	1
13	Backing Plate	3
14	Aluminum Track	1
15	Rack	1
16	Spacer for Stopper Axle	4
17	Rubber Foot	4
18	Transportation Wheel	2
19	Console Assembly	1
19~1	Console Top Cover	1
19~2	Console Bottom Cover	1
19~3	Book Rack	1
19~4	Console Bottom Cover	1
19~5	Deflector Fan Grill	1
19~6	Wind Duct (R)	1
19~7	Wind Duct (L)	1
19~8	Water-resist Rubber	1
19~9	Fan Grill Anchor	2
19~10	LCD Transparent Piece	1
19~12	Fan Grill Anchor	2
19~13	Fan Assembly	1
19~14	Console Display Board	1
19~15	Key Board	1
19~16	Interface Board	1
19~17	300m/m_W/Receiver, HR	1
20	Drive Pulley	1
23	Ø32(1.8T)_Button Head Plug	2
24	Ø25.4 × 2.0T_Button Head Plug	2
25	Ø38_Seat Track Wheel	8
26	300m/m_Hand Pulse Sensor Assembly W/Cable	1
27	750m/m_Handpulse W/Cable Assembly(L)	1
27~1	950m/m_Handpulse W/Cable Assembly(R)	1
28	Crank Arm End Cap	2

Part Number	Part Description	Qty per unit
29	Front Shroud (L)	1
30	Front Shroud (R)	1
31	Console Mast Cover	1
32	Handgrip End Cap	4
33	Bottom Cover	1
34	Round Disk	2
35	Rear Shroud (L)	1
36	Rear Shroud (R)	1
38	Drink Bottle Holder (R)	1
39	Drink Bottle Holder (L)	1
41	Transformer Power Cord	1
42	300m/m_Hand Pulse Sensor Assembly W/Cable	1
43	Gear Motor	1
44	750m/m_Computer Cable	1
45	2100m/m_Hand Pulse Sensor Assembly W/Cable	1
46	300m/m_Sensor W/Cable	1
48	750m/m_DC Power Cord	1
51L	Crank Arm (L)	1
51R	Crank Arm (R)	1
52	6004_Bearing	2
53	6203_Bearing	2
54	Drive Belt	1
55	Flywheel	1
56	Magnet	1
61	Seat	1
62	Steel Cable	1
63	Mesh Seat Back	1
64	Handgrip Foam	2
65	3/8" × 53m/m_Carriage Bolt	2
66	1/4" × UNC20 × 3/4"_Hex Head Bolt	4
67	3/8" × 4"_Hex Head Bolt	2
68	5/16" × UNC18 × 5/8"_Hex Head Bolt	8
71	3/8" × 1-3/4"_Hex Head Bolt	4
72	Ø1/4" × 13 × 1T_Flat Washer	5
73	Ø1/4" × 19 × 1.5T_Flat Washer	4
75	Ø17 × Ø23.5 × 1T_Flat Washer	1
76	Ø5/16" × Ø18 × 1.5T_Flat Washer	7
77	Ø3/8" × Ø19 × 1.5T_Flat Washer	13
79	Ø8 × Ø18 × 3T_Knurled Lock Washer	4
81	3/8" × 3/4"_Button Head Socket Bolt	1
82	5/16" × 1.5T_Split Washer	8
83	Ø5/16" × 19 × 1.5T_Curved Washer	2
84	Ø3/8" × Ø25 × 2T_Flat Washer	2
85	Ø17_C Ring	1
86	Ø20_C Ring	2

Part Number	Part Description	Qty per unit
87	M8 × 130m/m_J Bolt	1
88	M8 × 7T_Nyloc Nut	5
89	3/8" × 7T_Nyloc Nut	9
90	1/4" × 8T_Nyloc Nut	4
91	5/16" × 6T_Nyloc Nut	3
93	M6 × 38m/m_Socket Head Cap Bolt	1
94	5/16" × UNC18 × 3/4"_Hex Head Bolt	6
95	M5 × 12m/m_Flat Head Socket Screw	10
97	3 × 20m/m_Tapping Screw	4
98	M6 × 15m/m_Phillips Head Screw	8
99	M5 × 12m/m_Phillips Head Screw	13
101	5 × 16m/m_Tapping Screw	10
103	3.5 × 16m/m_Sheet Metal Screw	12
104	Spring	1
105	4 × 16m/m_Sheet Metal Screw	4
106	5/16" × UNC18 × 1-3/4"__Button Head Socket Bolt	2
108	M10 × 1.25m/m_Nut	2
109	3/8" × 7T_Nut	8
110	3/8" × 2"_Flat Head Socket Bolt	4
111	M5 × P0.8 × 10L_Flat Phillips Head Screw	8
112	12/14m/m_Wrench	1
114	Phillips Head Screw Driver	1
116	Pedal (L)	1
117	Pedal (R)	1
119	3/8"-UNF26 × 3T_Nut	1
120	3/8"-UNF26 × 4T_Nut	1
121	3/8"-UNF26_Nut	2
122	Drink Bottle (Optional)	1
123	Chest Strap (Optional)	1
125	Seat Carriage Cover	1
126	HGP Wire Grommet	1
129	M6 × 6T_Nyloc Nut	1
131	Power Adaptor	1
132	14/15m/m_Wrench	1
140	Sensor Rack	1
141	Handle Bar Cover	1
142	3/8" × 4-1/4"_Hex Head Bolt	2
143	Seat Track Fixing Plate	1
148	Block	1
153	Console Holder Assembly	1
154	5/16" × UNC18 × 2-1/2"_Hex Head Bolt	1
157	5/16" × 25 × 3T_Nylon Washer	2
160	Ø5/16" × 16 × 1.5T_Flat Washer	6
161	M6 × 10L_Flat Phillips Head Screw	4
162	Ø1/4" × Ø16 × 1.0T_Flat Washer	4
163	Sleeve	4

Part Number	Part Description	Qty per unit
164	M6 × 19L_Nut	4
165	M6 × 10L_Button Head Socket Bolt	4
166	PU Wheel	4
167	Seat Front/Aft Adjustment Lever	1
168	Lever Anchor	1
169	M5 × 25m/m_Flat Head Socket Screw	2
170	Ø15 × Ø6 × 4T_Nylon Washer	1
171	M5 × 45m/m_Socket Head Cap Bolt	1
172	Ø5 × Ø10 × 1.0T Flat Washer	1
173	M5 × 5T_Nyloc Nut	1
177	Rubber Foot Pad	1
185	3/8" × 4T_Nut	1
189	Rubber Pad	1
191	3/8" × UNC16 × 12.5T_Cap Nut	2
